

Prepared by Todd Beal

FEMA Region 6 Weather Threat Briefing

Monday March 15, 2021

Disclaimer: The purpose of this briefing is to provide a <u>Regional</u> weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information.

To find your local NWS forecast office, go to <u>www.weather.gov/srh</u>.

Summary of the Upcoming Week

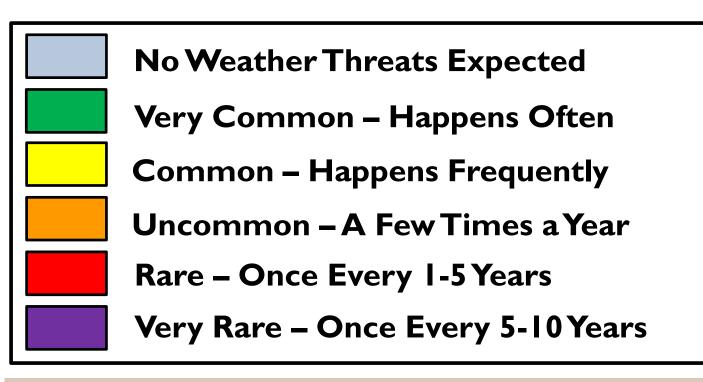

- Severe weather will be possible on Tuesday and Wednesday across TX, OK, LA, and AR. Greatest chance of significant severe weather will be across AR on Wednesday.
- Heavy rainfall and flash flooding will be possible across N OK on Tuesday and NE AR on Wednesday.
- Windy conditions across S NM and W TX on Tuesday.
- Elevated to critical fire weather conditions across NM into W TX on Tuesday.

FEMA Region 6 Threat Matrix

Mar 15, 2021 - Mar 19, 2021

DAY / THREAT	Mon	Tue	Wed	Thu	Fri
Severe Storms		OK/W AR/NTX	AR/NE LA		
			E OK/ETX/LA/W AR		
Heavy Rain / Flash Flooding		NOK	NEAR		
Fire Weather		NM/WTX			
Winds		S NM/WTX			
Winter Weather					
River Flooding	NE OK, N AR	NE OK, NAR	NE OK, NAR	NE OK, N AR	NE OK, NAR
	LA,AR,ETX	LA,AR,ETX	LA,AR,ETX	LA,AR,ETX	LA,AR,ETX

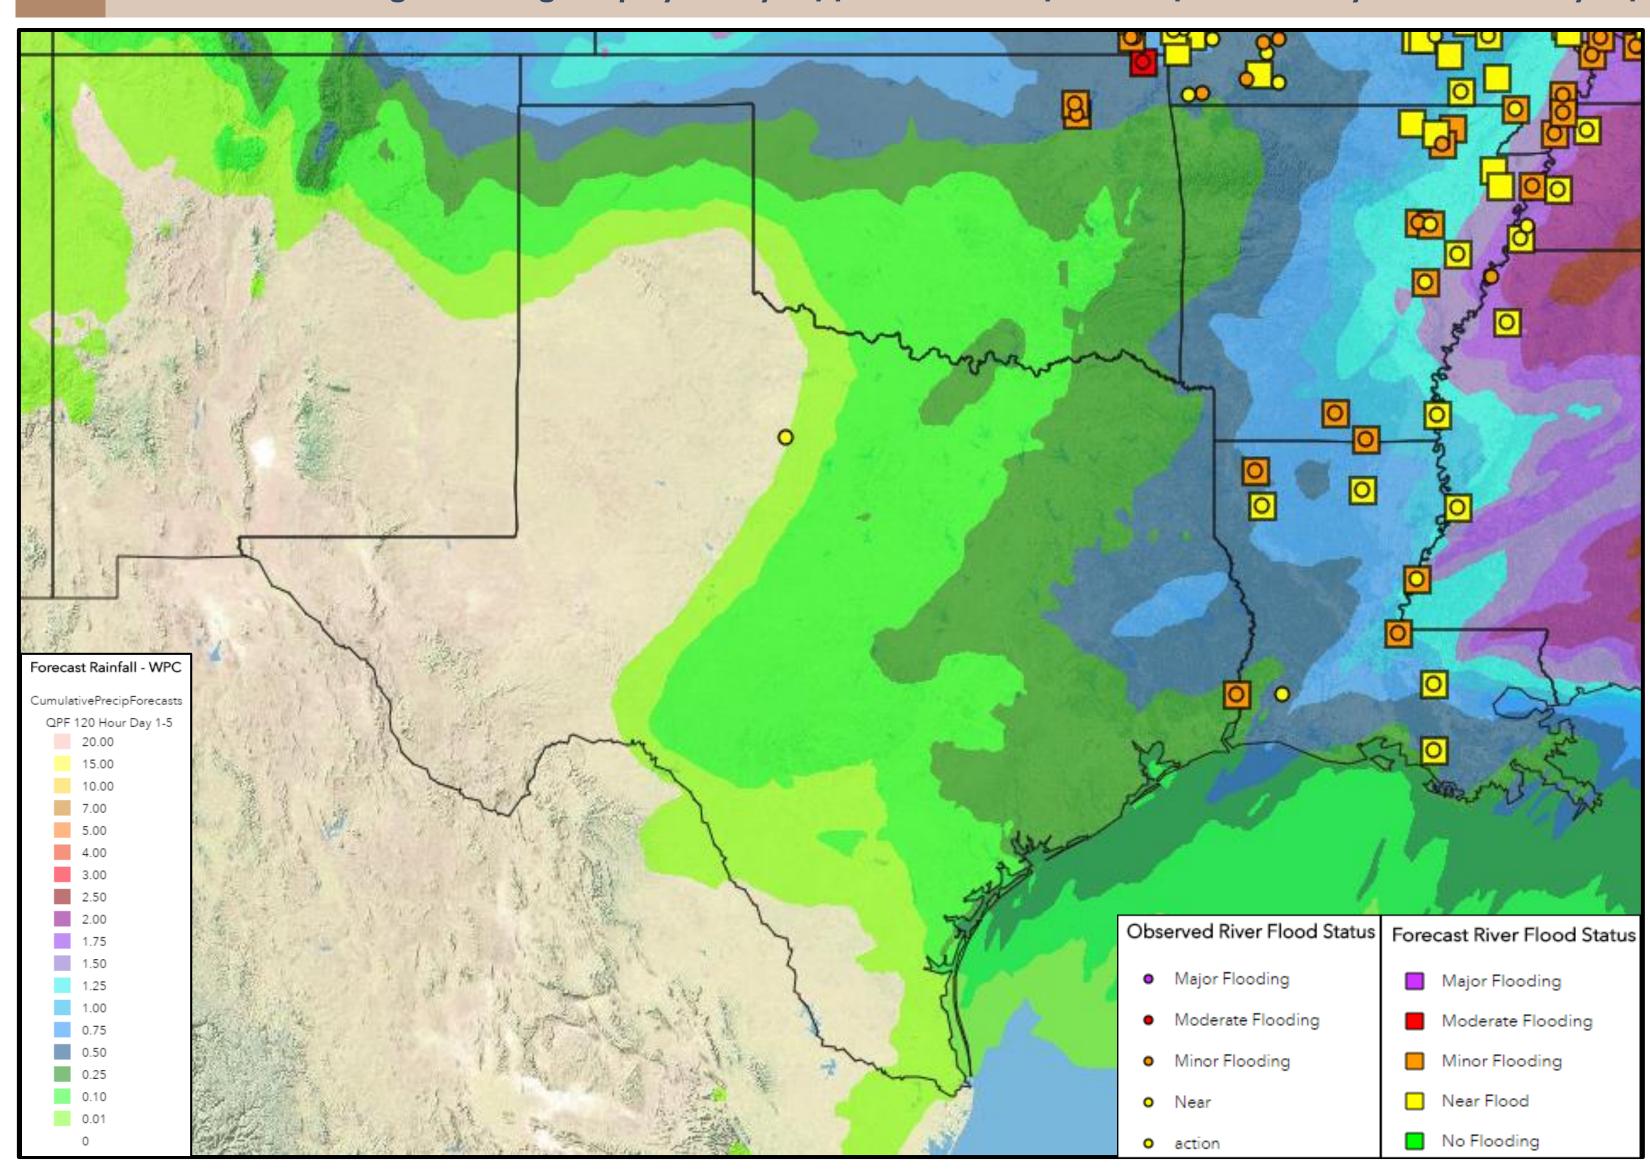

Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

For more details on the colors in the threat matrix refer to the last slide in this briefing.

5-Day Precipitation Forecast & River Flood Status

SR ROC
REGIONAL OPERATIONS CENTER

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

Isolated moderate river flooding is occurring across NE OK on the Neosho River near Commerce. Agricultural flooding with Riverview Park experiencing minor to moderate flooding.

Minor river flooding continues across portions of LA, AR, and ETX with minor impacts to secondary roads and agricultural/recreational areas.

On the MS River, minor flooding is occurring at Osceola in NE AR and Red River Landing in SE LA with impacts to secondary roads and barge traffic.

The MS River at Baton Rouge and New Orleans is expected to slowly rise and crest later this week below flood stage.

	Weather "Threat" Matrix						
Color	Definition	Criteria	Example(s)				
Green	Very Common Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	 Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees Something that happens almost every day in a particular season such as seabreeze storms in coastal TX 				
Yellow	Somewhat Common — Happens Frequently Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	 2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1" hail 				
Orange	Uncommon — A Few Times a Year Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	 A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail Some large fires reported, burn bans advertised, critical conditions expected 				
Red	Rare – Once every 1-5 Years Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	 A Category 1 hurricane will be moving towards the NW Gulf in the next few days Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail Large fires ongoing throughout the area with critical fire weather conditions expected to continue 				
Purple	Very Rare – Once Every 5-10 Years Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	 A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow Widespread severe storms expected, tornado outbreak probable with long- lived, very widespread and particularly intense storms 				

Criteria for the color codes in this briefing is to the left, please provide any feedback to
